

Elliott's Service and Support SHINES AGAIN!

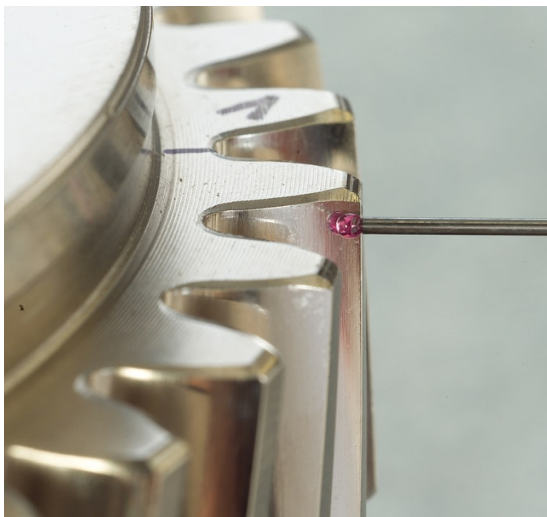

When You're in Jam,
We've Got Your Back

"I have to thank you and the Elliott team for pulling through for me and getting our CMM up and running back on August 2nd. It just goes to reinforce the belief that we made the right decision to purchase from you.

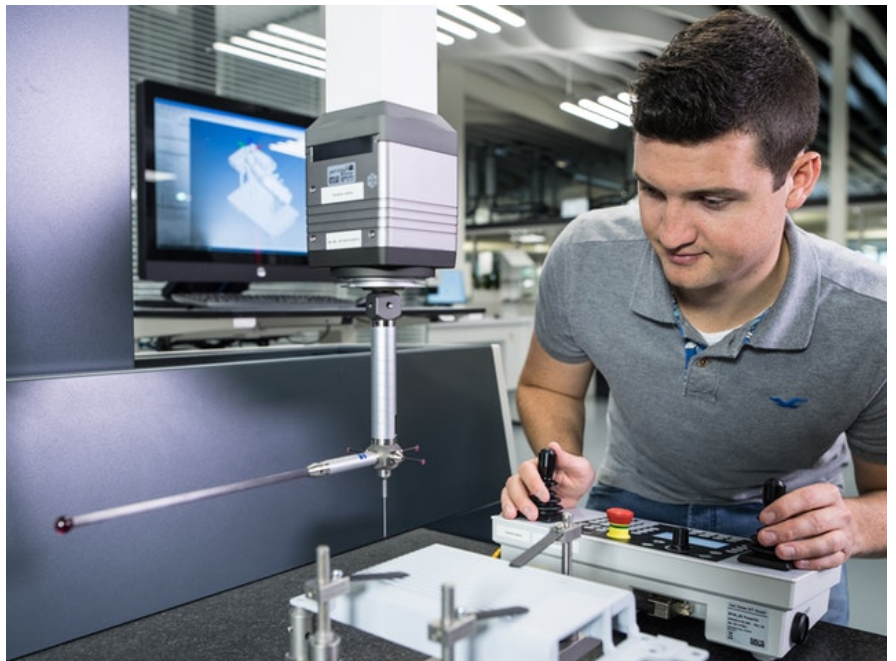

Except for a few minor glitches, some of which were operator error, we have been very happy with the Zeiss Contura.

Thanks to your timely action we were able to maintain schedule and push forward."

Art Nickelo - Quality Manager at Curtiss-Wright

Top: Zeiss's Contura CMM. For more information on Zeiss Contura, email info@elliottmachinery.com
Below: The system is controlled via a userfriendly control panel and does not need a computer. The progressive joystick enables easier and more precise control of all axis movements. The speed can be regulated in CNC mode.
