

## **Elliott Signs Agreement to Distribute Samsung Machine Tools in Canada**

Elliott Matsuura Canada Inc. has partnered with Samsung Machine Tools to provide a valuable new product line to meet today's demanding requirements of the metal cutting industry. Samsung Machine Tool is a certified ISO 9001 and CE metal cutting machine manufacturer that have been around since the 1980's. In the past, Samsung Machine Tools has enjoyed much success building licensed products for such notable machine manufactures as OKK, Mori Seiki, and Toshiba. "We are confident that the relationship between Elliott Matsuura and Samsung Machine Tools has a bright future. We are excited to see where this partnership will take us." said Steve Lesnewich, President of Samsung Machine Tool America.

Based in Oakville, Ontario, Elliott Matsuura Canada Inc. has been supplying and supporting quality machine tools to the Canadian metal cutting industry since 1950. Elliott carries a full range of metalworking machinery, including EDM machines, machining and turning centers, grinders, metal forming and metrology equipment, horizontal boring mills, vertical turning lathes and much more. Elliott Matsuura also provides applications engineering support, including demonstrations, time studies, training, programming, feasibility studies, tooling and fixture selection and design, as well as plant and equipment layout. Please come and visit the Elliott showroom in Oakville, Ontario!
