

January 2015

President's Message - Celebrating 65 years of support and service to Canada's metalworking industry!

This year Elliott Matsuura Canada Inc. is 65 years old and we have reason to celebrate with our customers. Thank you for your patronage!

Many things have changed since the early beginning in 1950, when B. Elliott (Canada) Ltd. opened its doors in Port Hope, Ontario and supplied manual machines to the Canadian industry. In 1988 Matsuura Japan purchased interest in Elliott Machinery and in 1992 Elliott Matsuura Canada Inc. moved to a new 32,000 sq. ft. facility in Oakville, ON.

Today Elliott Matsuura employs 75 people and represents four core products: Matsuura, Nakamura Tome, +GF+ AgieCharmillesMikron and Carl Zeiss. Other complementary lines include Brother, Cheto, Correa-Anayak, Hurco, Skoda, Tacchi, Tornos, YCM, as well as fabrication machines from LVD-Strippit and Jet-Edge.

With more than half of our staff holding technical support positions in product management, service and applications engineering, Elliott provides unparalleled service and support. This was something we decided to do 30 years ago. "We would build the company by providing the best service and support in the industry."

Elliott Matsuura has built a reputation for providing high quality products supported by professional staff and top-notch service. Elliott Matsuura will continue to forge ahead in the coming years and remain a leader in the Canadian metalworking industry.

To celebrate our 65th anniversary, we invite Canadian manufacturing companies to visit our Elliott facility or contact our Regional Sales Managers to learn about the specials and promotions Elliott is holding throughout 2015. Please ask about the "Machine of the Month" promotion and the Elliott pre-approved financing special offers.

Frank Haydar, C.G.A.

President

Elliott Matsuura Canada Inc.
